E IMPACTS ON PROGRAMS/DEPTS:

management.			
-------------	--	--	--

Communications SLOA: Student will demonstrate culturally appropriate oral & written communications skills in a variety of contexts, including academic communication, policymaking communication, business communication, and communicating with community audiences. A baseline of written and

- x RD 350 Community-based Research in Indigenous Contexts has been split into two courses (above).
- x RD 300 Rural Development Internship has also been eliminated because most students do not need internship experience and are petitioning out of the course. The course is still available for those who do, but is no longer part of the core.

Two courses have been revised to better reflect the content of the courses:

- x RD 325 Community Development Strategies has been renamed “Rural Development Principles and Practices” and the description has been updated.
- x RD 351 Strategic Planning for Rural Communities has been renamed “Strategic Planning and Decision Making” and the description has been updated.

Concentration:

- x Credit requirement for concentrations has been reduced from 21 credits to 15 credits. Three of those credits were added to the core. The other three have become electives. Since the concentration areas are now more focused another elective option will help students who come to the program with large numbers of previously earned credits.
- x The reduction in concentration credits from 21 to 15 is due, in part to the need for students to have a minor, a requirement that had not been followed due to the program being originally approved without a minor requirement (the concentrations were intended to meet the spirit of the minor requirement). The department was unable to continue without the minor so the concentrations have been tightened in terms of required classes and reduced in credits.
- x Each concentration area now has 3 required courses (9 credits). Having required concentration courses will focus students and ensure that they graduate with the necessary knowledge and skills in that concentration area. Students have been able to select from such a wide variety of courses that it is possible to graduate with a concentration area without taking any classes that directly address the topic.
- x T
