

COMMUNITY DEVELOPMENT PROJECT

1. The first stage of the project is to identify the needs of the community. This involves a thorough analysis of the current situation and the identification of the key issues that need to be addressed.

2. The second stage is to develop a plan of action. This involves setting clear objectives and identifying the resources that will be needed to achieve them.

3. The third stage is to implement the plan. This involves working closely with the community to ensure that the project is carried out in a way that is sensitive to their needs and values.

4. The final stage is to evaluate the project. This involves assessing the impact of the project and identifying any lessons learned that can be used to improve future projects.
